

CL2-B PNEUMATIC RIVETER

The CL2-B Bench mounted riveter offers an extremely cost effective option for smaller workshops, whilst at the same time providing flexibility within larger organisations, as an addition to their bulk production plant.

This machine is scheduled for riveting semi-tubular or full tubular rivets from diameters from 3,5 mm to 10mm maximum.

The CL2-B meets the requirements for all levels of brake and clutch lining assembly as well as industrial applications. The tooling supplied is also capable of de-riveting rivets.

Changeover of the tooling is easily carried out.

Spécifications :

Working pressure : 5bar (80 psi)

Force at the punch : 2,25 tones

Height : 66 cm

Length : 71 cm

Width : 28 cm
